## UNWTO Tourism Highlights

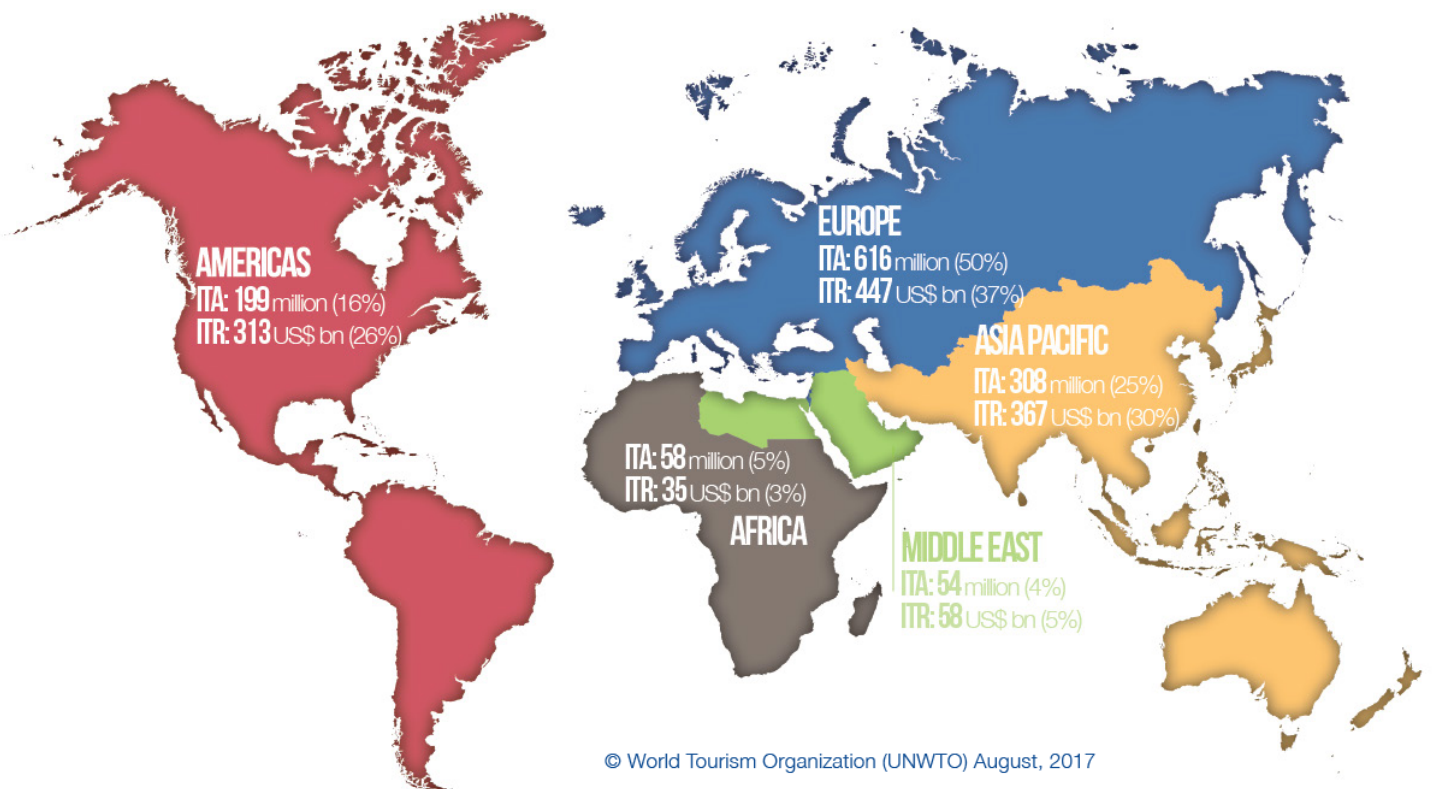

2017 Edition

## Tourism - key to development, prosperity and well-being

- An ever-increasing number of destinations worldwide have opened up to, and invested in tourism, turning it into a key driver of socio-economic progress through the creation of jobs and enterprises, export revenues, and infrastructure development.
- Over the past six decades, tourism has experienced continued expansion and diversification to become one of the largest and fastest-growing economic sectors in the world. Many new destinations have emerged in addition to the traditional favourites of Europe and North America.
- Tourism has boasted virtually uninterrupted growth over time, despite occasional shocks, demonstrating the sector's strength and resilience. International tourist arrivals have increased from 25 million globally in 1950 to 278 million in 1980, 674 million in 2000, and 1,235 million in 2016.
- Likewise, international tourism receipts earned by destinations worldwide have surged from US\$ 2 billion in 1950 to US\$ 104 billion in 1980, US\$ 495 billion in 2000, and US\$ 1,220 billion in 2016.
- Tourism is a major category of international trade in services. In addition to receipts earned in destinations, international tourism also generated US\$ 216 billion in exports through international passenger transport services rendered to non-residents in 2016, bringing the total value of tourism exports up to US\$ 1.4 trillion, or US\$ 4 billion a day on average.
- International tourism represents 7% of the world's exports in goods and services, after increasing one percentage point from 6% in 2015. Tourism has grown faster than world trade for the past five years.
- As a worldwide export category, tourism ranks third after chemicals and fuels and ahead of automotive products and food. In many developing countries, tourism is the top export category.

## INTERNATIONAL TOURISM 2016

International tourist arrivals (ITA): 1,235 million  
International tourism receipts (ITR): US\$ 1,220 billion

## International tourism in 2016 – Key trends and outlook

- International tourist arrivals (overnight visitors) in 2016 grew by 3.9% to reach a total of 1,235 million worldwide, an increase of 46 million over the previous year. It was the seventh consecutive year of above-average growth in international tourism following the 2009 global economic crisis. A comparable sequence of uninterrupted solid growth has not been recorded since the 1960s.
- Demand for international tourism followed the positive trend of previous years, with many destinations reporting sound results, while a few faced security incidents. Some redirection of tourism flows was observed, though most destinations shared in the overall growth due to stronger travel demand, increased connectivity and more affordable air transport.
- By UNWTO region, Asia and the Pacific led growth in 2016 with a 9% increase in international arrivals, followed by Africa (+8%) and the Americas (+3%). The world's most visited region, Europe (+2%) showed mixed results, while available data for the Middle East (-4%) points to a decline in arrivals.
- International tourism receipts grew by 2.6% in real terms (taking into account exchange rate fluctuations and inflation) with total earnings in the destinations estimated at US\$ 1,220 billion worldwide in 2016 (euro 1,102 billion).
- France, the United States, Spain and China continued to top the international arrivals ranking in 2016. In receipts, the US and Spain remain at the top, followed by Thailand, which climbed to number 3 last year, and China, which is fourth. France and Italy moved up in receipts to 5<sup>th</sup> and 6<sup>th</sup> position respectively, while the United Kingdom, Mexico and Thailand moved up to 6<sup>th</sup>, 8<sup>th</sup> and 9<sup>th</sup> place in arrivals.
- China, the United States and the Germany led outbound tourism in their respective regions in 2016, and continue to top the expenditure ranking in that order.

## Long-term outlook

- International tourist arrivals worldwide are expected to increase by 3.3% a year between 2010 and 2030 to reach 1.8 billion by 2030, according to UNWTO's long-term forecast report *Tourism Towards 2030*.
- Between 2010 and 2030, arrivals in emerging destinations (+4.4% a year) are expected to increase at twice the rate of those in advanced economies (+2.2% a year).
- The market share of emerging economies increased from 30% in 1980 to 45% in 2016, and is expected to reach 57% by 2030, equivalent to over 1 billion international tourist arrivals.

# International tourist arrivals

## Seven consecutive years of sustained growth

International tourist arrivals (overnight visitors) reached a total of 1,235 million in 2016. This was 46 million more than in 2015, or an increase of 3.9%. The global pace of growth was slightly more moderate than in 2015 (4.5%), but in line with UNWTO's long-term forecast of 3.8% per year for the period 2010 to 2020.

Demand for international tourism in 2016 followed the positive trend of previous years, with many destinations reporting sound results, although a few faced security incidents, either in their country or in their region. Some redirection of tourism flows was observed, though most destinations shared in the overall growth due to stronger travel demand, increased connectivity, more affordable air transport and simpler visa procedures in many countries.

By UNWTO region, Asia and the Pacific led growth in 2016 with a 9% increase in international arrivals, followed by Africa (+8%), which rebounded after two difficult years. In the Americas (+3%) the growth momentum continued. Europe (+2%) showed mixed results, with double-digit growth in some destinations and declines in others. Available data for the Middle East (-4%) points to a decline in arrivals, although results vary across destinations. By subregion, the strongest results were recorded in Subsaharan Africa (+10%), followed by Oceania, North-East Asia and South-East Asia (all +9%), South Asia (+8%) and South America (+7%).

2016 marks the seventh consecutive year of sustained growth in international tourism, with arrivals increasing by 4% or more every year following the global economic crisis of 2009. A comparable sequence of uninterrupted solid growth has not been recorded since the 1960s. The 1 billion international arrivals mark in a single year was exceeded for the first time in 2012. This has further increased to 1.2 billion in 2016, with 305 million more international tourist arrivals recorded compared to 930 million in the pre-crisis year of 2008.

## Slightly more travel by air than surface transport

In 2016, slightly over half of all overnight visitors travelled to their destination by air (55%), while the remainder travelled by surface transport (45%) – whether by road (39%), rail (2%) or water (4%). The trend over time has been for air transport to grow at a somewhat faster pace than surface transport, thus the share of air transport is gradually increasing.

## Over half of visits for leisure purposes

Travel for holidays, recreation and other forms of leisure accounted for just over half of all international tourist arrivals in 2016 (53% or 657 million). Some 13% of all international tourists reported travelling for business and professional purposes, and another 27% travelled for other reasons such as visiting friends and relatives (VFR), religious reasons and pilgrimages, health treatment, etc. The purpose of visit for the remaining 7% of arrivals was not specified.

## International tourism receipts

### Tourism ranks as world's third largest export category

Expenditure by international visitors on accommodation, food and drink, entertainment, shopping and other goods and services in tourism destinations reached US\$ 1,220 billion (euro 1,102 billion) in 2016. This represents an increase of 2.6% in real terms, i.e. taking into account exchange rate fluctuations and inflation. Tourism receipts followed the overall trend in international tourist arrivals, though at a somewhat slower pace.

Growth in receipts is computed in real terms in order to avoid the distortions caused by exchange rate shifts between local currencies and the US dollar, although such fluctuations were fairly contained in 2016 (the average US dollar-euro rate hardly varied from 2015). In real terms, tourism receipts increased by 8% in Africa, 5% in Asia and the Pacific, 3% in the Americas and 1% in Europe, while they declined 2% in the Middle East.

In macro-economic terms, expenditure by international visitors counts as exports for the destination country, and as imports for the country of residence of the visitor. For many countries inbound tourism is a vital source of foreign currency earnings and an important contributor to the economy, creating much-needed employment and opportunities for development.

In addition to the tourism receipts earned in the destinations (the travel item of the Balance of Payments), international tourism also generated US\$ 216 billion in exports through international passenger transport services rendered to non-residents in 2016. Added to the US\$ 1,220 billion in tourism

(Data as collected by UNWTO, July 2017)

receipts in destinations, the value of tourism exports amounted to US\$ 1.4 trillion, or US\$ 4 billion a day on average.

International tourism (comprising both earnings in destinations and passenger transport) represents 30% of the world's services exports. It also accounts for 7% of overall exports in goods and services. In fact, international tourism has grown faster than world merchandise trade for five consecutive years now.

As a worldwide export category, tourism ranks third after chemicals and fuels, and ahead of automotive products and food. In many developing countries tourism is the top export category. For emerging economies as a whole, tourism represents 40% of services exports, well above the 30% world average. Tourism is increasingly an essential component of export diversification, both for emerging and advanced economies, and often shows a strong capacity to compensate for weaker export revenues in many commodity and oil exporting countries.

## World's top tourism destinations

### Thailand continues to rise in the rankings

In 2016, four countries moved up in the Top 10 ranking by international tourism receipts and three in the ranking by international tourist arrivals (overnight visitors). Most notably, Thailand climbed further, up to 3<sup>rd</sup> place from 5<sup>th</sup> in terms of tourism receipts in its second year of double-digit growth, hitting the US\$ 50 billion mark in 2016. It also moved up one place in arrivals to 9<sup>th</sup> position (33 million).

When ranking the world's top international tourism destinations, it is preferable to take more than a single indicator into account. Ranked according to the two key tourism indicators

– international tourist arrivals and international tourism receipts – it is interesting to note that eight out of the Top 10 destinations appear on both lists, despite showing marked differences in terms of the type of tourists they attract, as well as their average length of stay and their spending per trip and per night. It should be noted that changes in the ranking of international tourism receipts not only reflect the relative performance of the destinations, but also exchange rate fluctuations of the local currencies against the US dollar.

The United States continues to top the international tourism receipts ranking, with US\$ 206 billion earned in 2016. It is the second largest destination in international tourist arrivals with 76 million. Spain follows as the world's second largest earner with US\$ 60 billion, and the third largest destination in terms of arrivals with 76 million, virtually equalling the US. China remains in fourth position in terms of both receipts (US\$ 44 billion) and arrivals (59 million). France climbed one place to 5<sup>th</sup> position in tourism earnings, with US\$ 42 billion, and remains the world's top destination in terms of international arrivals with 83 million. Italy moved up one place to 6<sup>th</sup> position in receipts (US\$ 40 billion) and is still 5<sup>th</sup> in arrivals (52 million).

The United Kingdom climbed two places to 6<sup>th</sup> position in arrivals, but moved down four places in receipts to 7<sup>th</sup>, partly due to the depreciation of the British pound, resulting in lower earnings in terms of US dollars. Germany remains 8<sup>th</sup> in terms of receipts and 7<sup>th</sup> in arrivals, while Hong Kong (China) continues to rank 9<sup>th</sup> in receipts and 13<sup>th</sup> in arrivals. Australia re-entered the Top 10 in terms of receipts at number 10, while moving from 42<sup>nd</sup> to 40<sup>th</sup> position in arrivals. Mexico climbed another place to 8<sup>th</sup> position in arrivals and moved up two in receipts to 14<sup>th</sup>. Turkey completes the Top 10 in arrivals, moving down an estimated four places (data still pending for 2016) following the security incidents and failed coup last year. In terms of receipts, Turkey moved down five places to 17<sup>th</sup> position.

# Regional results

## Europe –Mixed results across destinations

Europe welcomed 616 million international tourists in 2016, equivalent to half the world total, an increase of 13 million from 2015. This corresponds to 2% growth, reflecting mixed results across individual destinations, with some reporting a remarkable performance whilst others recorded weaker results due to security concerns. International tourism receipts in Europe grew 1% in real terms to US\$ 447 billion (euro 404 billion), which represents 37% of receipts worldwide.

Northern Europe led growth in the region, with a 6% increase in international arrivals, or 5 million more than in 2015. Iceland (+39%), Norway (+12%), Ireland (+11%) and Sweden (+8%) all boasted above-average growth. The United Kingdom (+4%), the subregion's largest destination, reported a comparatively more modest growth, despite the weaker British pound.

In Central and Eastern Europe, arrivals increased by 4% in 2016. Many destinations enjoyed strong results, including Georgia (+19%), Slovakia (+17%), Bulgaria (+16%), Romania and Lithuania (both +11%). Hungary and Ukraine both recorded a 7% growth in arrivals, while Poland and the Czech Republic both reported an increase of 4%. By contrast, the decline in arrivals to the Russian Federation (-9%), the subregion's top destination, weighed down the subregional average.

Growth in Southern and Mediterranean Europe (+1%) was modest, despite sound results in most countries, driven by Portugal (+13%), top destination Spain (+10%) and Croatia (+9%). Balkan destinations Serbia (+13%), Slovenia (+12%) and Albania (+8%) also enjoyed robust growth, as did island destinations Cyprus (+20%) and Malta (+10%). Greece reported a 5% increase in arrivals and Italy 3%. The subregional average was weighed down by the significant decline in arrivals faced by Turkey following various terrorist attacks and a failed coup.

Results in Western Europe (0%) were rather mixed in 2016, as some destinations were impacted by security concerns. The Netherlands and Austria both reported a 5% growth in arrivals, and Germany a 2% growth. The world's top tourism destination, France (-2%), faced the aftermath of security incidents, as did Belgium (-10%).

## Asia and the Pacific – Fastest-growing region in 2016

Asia and the Pacific recorded 308 million international tourist arrivals in 2016, an increase of 9%, or 24 million more than in 2015, the highest increase in both relative and absolute terms across the five UNWTO regions. International tourism receipts increased 5% in real terms to US\$ 367 billion, US\$ 17 billion more than in 2015. Asia and the Pacific accounted for 25% of the world's arrivals and 30% of the world's receipts. All four subregions enjoyed strong results in 2016. Growing purchasing power in emerging economy markets, increased air connectivity, more affordable travel and a relaxation of visa requirements continue to fuel tourism demand from within and outside the region.

Asia's largest subregion, North-East Asia (+9%), recorded 12 million more international arrivals in 2016. The Republic of Korea (+30%) rebounded strongly after the MERS outbreak in 2015 and Japan (+22%) boasted its fifth straight year of double-digit growth. Arrivals in Macao (China) increased by

10%, with China, the subregion's largest destination, recording 4% growth and Taiwan (pr. of China) 2%. Hong Kong (China) experienced a slight decline in arrivals.

In South-East Asia (+9%), results were driven by top destination Thailand (+9%), which enjoyed a second year of strong growth, and Vietnam (+26%). Archipelago destinations Indonesia (+15%) and the Philippines (+11%) also reported double-digit growth in 2016 after similarly strong results a year earlier. International arrivals in Singapore were 7% higher, while Cambodia reported 5% growth and Malaysia 4%.

In Oceania (+9%), major destinations Australia and New Zealand (both +11%) reported double-digit growth in international arrivals, aided by increased air capacity. The Northern Mariana Islands and Guam enjoyed 11% and 9% growth respectively, while Fiji reported a 5% increase in arrivals.

South Asia recorded an 8% increase in international tourist arrivals in 2016, driven by India (+10%), the subregion's top destination. Nepal reported a significant 40% increase in arrivals, rebounding from poor results in 2015 after the Gorkha and Kodari earthquakes. Sri Lanka (+14%) enjoyed its seventh consecutive year of double-digit growth, while island destination the Maldives reported an increase of 4%.

## The Americas – South America leads growth

International arrivals in the Americas grew by 7 million (+3%) in 2016 to reach nearly 200 million, equivalent to 16% of the world total. Travel demand remained robust, despite concerns over the zika virus in some destinations. By subregion, South America (+7%) led the results, followed by the Caribbean and Central America (both +5%), while North America welcomed 2% more arrivals. International tourism receipts in the Americas increased by 3% in real terms to US\$ 313 billion (26% share), up US\$ 8 billion from 2015.

North America, which accounts for two-thirds of all arrivals in the region, recorded 2% growth in 2016. Both Canada (+11%) and Mexico (+9%) enjoyed strong travel demand from the US, supported by the favourable exchange rates of their currencies against the US dollar. In the United States (-2%) arrivals declined slightly.

Results in South America (+7%) were led by Chile (+26%), which reported its third straight year of double-digit growth. Colombia (+11%) and Uruguay (+10%) also boasted double-digit growth, while Peru (+8%) continued to enjoy a strong momentum. Brazil, the subregion's largest destination, reported a 4% growth in arrivals after hosting the Rio 2016 Olympic and Paralympic Games. Ecuador suffered a moderate decline in the aftermath of the April earthquake, which affected some coastal areas.

In Central America (+5%), growth figures were positive across virtually all destinations, with leading destination Costa Rica reporting a 10% increase in arrivals, Nicaragua a 9% increase and Guatemala 8%. Results in Honduras (+3%) and El Salvador (+2%) were more modest, while in Panama arrivals declined after a very strong performance in 2015.

The Caribbean (+5%) saw a robust performance in 2016, led by Cuba (+14%) and the Dominican Republic (+6%). Arrivals in Puerto Rico grew by 5% last year, while Jamaica welcomed 3% more international tourists. The Bahamas reported flat growth and Aruba a decline, while results in the smaller island destinations were fairly mixed.

(Data as collected by UNWTO, July 2017)

**Series of International tourist arrivals and departures:**

TF = International tourist arrivals at frontiers (overnight visitors, i.e. excluding same-day visitors)  
 VF = International visitors arrivals at frontiers (tourists and same-day visitors)  
 THS = International tourists arrivals at hotel and similar establishments  
 TCE = International tourists arrivals at collective tourism establishments  
 TD = Departures of tourists (overnight visitors, i.e. excluding same-day visitors)  
 VD = Departures of both overnight and same-day visitors

\* = Provisional figure or data  
 .. = Figure or data not (yet) available  
 | = Change of series  
 n/a = Not applicable  
 . = Decimal separator  
 , = Thousands separator

## Africa – A strong rebound in 2016

International tourist arrivals in Africa increased by an estimated 8% in 2016 according to the comparatively limited data available to date, representing a strong rebound after a weaker performance in 2014 and 2015 in the wake of various health, geopolitical and economic challenges. The region welcomed 58 million international tourists in 2016 (5% of the world total), 4 million more than in 2015, earning US\$ 35 billion in international tourism receipts (3% share), an increase of 8% in real terms.

Subsaharan Africa (+10%) led the region's recovery, with the highest increase across all world subregions. South Africa, the subregion's top destination, enjoyed 13% growth in international arrivals, partly thanks to simpler visa procedures. Kenya (+17%) and Tanzania (+16%) also boasted double-digit growth in 2016, rebounding from weaker figures in 2015. Island destinations Madagascar (+20%), Cabo Verde (+15%), Mauritius (+11%) and the Seychelles (+10%) also posted double-digit growth, supported by improved air and sea connectivity.

In North Africa (+3%) the recovery started in the third quarter of 2016, thanks to a change in trend in Tunisia (+7%) and Morocco (+2%). The strengthening of security, as well as the gradual recovery of the Russian market and the redirection of tourism flows from other troubled destinations, contributed to these results.

## Middle East – A small decline amid challenges

International arrivals in the Middle East are estimated to have decreased by 4% in 2016, with mixed results across the region where solid growth in some destinations was not sufficient to offset decreases in others. The region welcomed 54 million international tourists in 2016, or 4% of the world total, and earned US\$ 58 billion in tourism receipts (5% share), a 2% decline in real terms from 2015.

Lebanon and Oman (both +11%) reported double-digit growth in arrivals in 2016, following strong results a year earlier. The United Arab Emirate of Dubai recorded a 5% increase in arrivals, while Jordan (+3%) started to rebound from its weaker performance a year earlier. Growth was flat in the subregion's top destination Saudi Arabia (0%). The region's average (-4%) was driven down by the sharp decline in Egypt (-42%) following the security incidents and negative travel advisories issued by some source markets. However, arrivals started to recover at the end of the year following important promotional efforts, and coinciding with the winter season in European markets.

## Outbound tourism

### Most tourists visit destinations within their own region

The large majority of international travel takes place within travellers' own regions (intra-regional tourism), with about four out of five arrivals worldwide originating in the same region. Traditionally the advanced economies of Europe, the Americas and Asia and the Pacific have been the world's major source markets for international tourism. Even so, emerging economies

in Asia, Central and Eastern Europe, the Middle East, Africa and Latin America have shown fast growth over recent years, driven by rising levels of disposable income.

Europe currently still remains the world's largest source region for outbound tourism, generating almost half of the world's international arrivals (48%), followed by Asia and the Pacific (26%), the Americas (17%), the Middle East (3%) and Africa (3%).

Destinations	International tourist arrivals by region of origin (million)								Market share (%)	Change (%)			Average a year (%)

<sup>1</sup> Countries that cannot be allocated to a specific region of origin. As information is derived from inbound tourism data, this occurs when data on the country of origin is missing, or when a category such as 'other countries of the world' is used, grouping countries together that are not separately specified.

## Top spenders in international tourism Few changes in the Top 10 source markets

China continues to lead global outbound travel, following ten years of double-digit growth in spending, and after rising to the top of the ranking in 2012. Expenditure by Chinese travellers grew by 12% in 2016 to reach US\$ 261 billion. The number of outbound travellers rose by 6% to reach 135 million in 2016.

Tourism expenditure from the United States, the world's second largest source market, increased by 8% in 2016 to reach US\$ 124 billion.

Germany, the United Kingdom and France are Europe's top source markets, and rank third, fourth and fifth respectively in the world. Germany reported an increase of 3% in spending last year to reach US\$ 80 billion. Demand from the United Kingdom remained sound last year, despite the significant depreciation of the British pound following the referendum on EU membership (Brexit). UK residents' overnight visits abroad were up by 5 million (+8%) to reach 69 million, with expenditure close to US\$ 64 billion (+14%). France reported a 3% growth in tourism expenditure in 2016 to reach US\$ 40 billion.

The five source markets in the bottom half of the Top 10 all moved up one place as the Russian Federation moved down

from 6<sup>th</sup> to 11<sup>th</sup> place, following a significant decline in spending abroad. Canada moved up to 6<sup>th</sup> place, despite flat growth in international spending (US\$ 29 billion), while outbound overnight trips declined by 3% to 31 million. The Republic of Korea spent 5% more in 2016 (US\$ 27 billion) and moved up further to 7<sup>th</sup> place, after having entered the Top 10 in 2015. The number of outbound travellers increased by 16% to reach 22 million. Italy climbed to 8<sup>th</sup> place with US\$ 25 billion in outbound tourism expenditure, up 2% from 2015, while reporting a 3% growth in overnight trips to 29 million. Australia moved up to 9<sup>th</sup> place with a 6% growth in spending to US\$ 25 billion, and a 5% increase in outbound trips to 10 million. Hong Kong (China) completes the Top 10 with 5% growth in expenditure to US\$ 24 billion and 92 million outbound trips (+3%).

Other source markets outside the Top 10, which showed double-digit growth in expenditure last year were: Spain, India, Argentina, Qatar, Thailand, Israel, Ireland, Ukraine, Vietnam and Egypt.

# UNWTO Tourism Towards 2030

## Long-term forecasts Substantial potential for further growth

*UNWTO Tourism Towards 2030* is UNWTO's long-term outlook, and an assessment of the development of tourism over the two decades from 2010 to 2030. It is a broad research project, building on UNWTO's ongoing work in the field of long-term forecasting initiated in the 1990s. This study replaces the earlier *Tourism 2020 Vision*, which has become a worldwide reference for international tourism forecasts.

A key output of *Tourism Towards 2030* is a set of quantitative projections for international tourism demand over a 20-year period, with 2010 as the base year, and ending in 2030. The updated forecast has been enriched with an analysis of the social, political, economic, environmental and technological factors that have shaped tourism in the past, and which are expected to influence the sector in the future.

According to *Tourism Towards 2030*, the number of international tourist arrivals worldwide is expected to increase by an average of 3.3% a year over the period 2010 to 2030. It is expected that the rate of growth will gradually decrease over time, slowing from 3.8% at the beginning of the period to 2.9% towards 2030, but it should be noted that this is on top of growing base numbers. In absolute numbers, international tourist arrivals will increase by some 43 million a year, compared with an average increase of 28 million a year during the period 1995 to 2010. At the projected rate of growth, international tourist arrivals worldwide are expected to reach 1.4 billion by 2020, and 1.8 billion by the year 2030.

International tourist arrivals in the emerging economy destinations of Asia, Latin America, Central and Eastern Europe, Eastern Mediterranean Europe, the Middle East and Africa will grow at double the rate (+4.4% a year) of that in advanced economy destinations (+2.2% a year). As a result, the number of arrivals in emerging economies is expected to exceed those in advanced economies before 2020. By 2030, 57% of international arrivals will be in emerging economy destinations (versus 30% in 1980) and 43% in advanced economy destinations (versus 70% in 1980).

The strongest growth by region is expected to occur in Asia and the Pacific, where arrivals are forecast to increase by 331 million to reach 535 million in 2030 (+4.9% per year). The Middle East and Africa are forecast to more than double their number of arrivals during this period, from 61 million to 149 million and from 50 million to 134 million respectively. Europe (from 475 million to 744 million) and the Americas (from 150 million to 248 million) are projected to grow comparatively more slowly.

Thanks to their faster growth, the global market shares of Asia and the Pacific (to 30% in 2030, up from 22% in 2010), the Middle East (to 8% from 6%) and Africa (to 7% from 5%) will all increase. As a result, Europe (to 41% from 51%) and the Americas (to 14% from 16%) will experience a further decline in their share of international tourism, mainly because of the slower growth of the comparatively mature destinations in North America, Northern Europe and Western Europe.

(Data collected by UNWTO, September 2011)

<sup>1</sup> Classification based on the International Monetary Fund (IMF); see the Statistical Annex of the IMF *World Economic Outlook* of April 2012, page 177, at [www.imf.org/external/pubs/ft/weo/2012/01](http://www.imf.org/external/pubs/ft/weo/2012/01).

*UNWTO Tourism Highlights* is a World Tourism Organization publication, which aims to provide an overview of international tourism trends during the year prior to its date of publication. The report was prepared by UNWTO's Statistics, Trends and Policy Programme.

For individual countries and territories, information reflects data as reported by national or international institutions up until July 2017. For the latest tourism data and trends, please refer to the *UNWTO World Tourism Barometer* at [mkt.unwto.org/barometer](http://mkt.unwto.org/barometer). For tourism statistics online, see the UNWTO e-library at [www.e-unwto.org](http://www.e-unwto.org).

For main concepts, definitions and classifications for the measurement of tourism, please see: *International Recommendations for Tourism Statistics 2008 (IRTS 2008)* at [statistics.unwto.org/content/irts-2008](http://statistics.unwto.org/content/irts-2008).

The World Tourism Organization (UNWTO), a United Nations specialized agency, is the leading international organization with a decisive and central role in promoting the development of responsible, sustainable and universally accessible tourism. It serves as a global forum for tourism policy issues, and as a practical source of tourism know-how. Its membership includes 157 countries, 6 Associate Members and over 500 Affiliate Members.

# UNWTO PUBLICATIONS

## UNWTO World Tourism Barometer

The *UNWTO World Tourism Barometer* and accompanying *Statistical Annex* aim to provide tourism stakeholders with up-to-date statistics and analysis in a timely fashion. The information is updated six times a year and covers short-term tourism trends, including a retrospective and prospective assessment of current tourism performance by the UNWTO Panel of Tourism Experts. Available in English, with the *Statistical Annex* also available in French, Spanish and Russian.

## Marketing Handbooks:

- Key Performance Indicators for Tourism Marketing Evaluation
- E-Marketing for Tourism Destinations
- Tourism Product Development
- Tourism Destination Branding

This series of Marketing Handbooks developed by UNWTO and the European Travel Commission (ETC) addresses key components of the marketing and promotion of tourism destinations. The handbooks provide a comprehensive overview of current strategies and best practices with regard to, among others, key performance indicators (KPIs), product development, destination branding and e-marketing, complemented with case studies and best practice recommendations.

## European Union Short-Term Tourism Trends

The new *European Union Short-Term Tourism Trends* series was created as part of the Enhancing the Understanding of European Tourism project between UNWTO and the Directorate-General for Internal Market, Industry, Entrepreneurship and SMEs of the European Commission (DG GROW). It is aimed at monitoring the short-term evolution of tourism trends in the European Union (EU-28) in terms of arrivals, receipts and outbound travel. Available in English.

## The Decision-making Process of Meetings, Congresses, Conventions and Incentives Organizers

This ETC/UNWTO study aims at providing a better understanding of the Meetings Industry and the way in which meeting and events organizers make decisions. The study offers a wide-ranging overview of the MCCI segments, as well as a comprehensive analysis of planners' needs and expectations with respect to destination and venue choice, complemented with best-practice examples. Available in English.

## Tourism Towards 2030

*UNWTO Tourism Towards 2030* is UNWTO's long-term outlook and assessment of future tourism trends. Key outputs of the study are quantitative projections for international tourism flows up to 2030, based on data series of international tourist arrivals by subregion of destination, region of origin and mode of transport. Available in English.

## Outbound Travel Market studies:

- Key Outbound Tourism Markets in South-East Asia
- The Indian Outbound Travel Market
- The Russian Outbound Travel Market
- The Middle East Outbound Travel Market
- The Chinese Outbound Travel Market

The *Outbound Travel Market* series offers a unique insight into fast-growing source markets around the world. UNWTO and ETC have analysed the key outbound markets of China, Brazil, the Russian Federation, India and the Middle East. Jointly with Tourism Australia, UNWTO has covered the key South-East Asian markets of Indonesia, Malaysia, Singapore, Thailand and Vietnam. Available in English.

## UNWTO/GTERC Asia Tourism Trends

The annual *Asia Tourism Trends* series includes an analysis of recent tourism trends in Asia, with emphasis on international tourist arrivals and receipts, as well as outbound tourism and expenditure. Furthermore, this report highlights other relevant topics relating to tourism development in Asia and the Pacific. Available in English.

## Understanding Russian Outbound Tourism Understanding Brazilian Outbound Tourism Understanding Chinese Outbound Tourism

The innovative UNWTO/ETC *Understanding Outbound Tourism Netnographic* series explores the behaviour and mind-set of outbound travellers based on internet and social media activity. Available in English.

## Compendium of Tourism Statistics, 2017 Edition. Data 2011-2015

The *Compendium* provides statistical data and indicators on inbound, outbound and domestic tourism, as well as on tourism industries, employment and relevant macroeconomic indicators. The *2017 edition* presents data for 200 countries, with methodological notes in English, French and Spanish.

## Yearbook of Tourism Statistics, 2017 Edition. Data 2011-2015

The *Yearbook of Tourism Statistics* focuses on data relating to inbound tourism (arrivals and nights), broken down by country of origin. The *2017 edition* presents data for 196 countries, with methodological notes in English, French and Spanish.
